**Quick Response Code:**

Dear Friends,

JSSTD has entered the 3<sup>rd</sup> year of publication. We thank all the authors who have trusted us with their valuable works and thus ensured a regular publication of JSSTD. We have covered some distance in our quest for perfection, but the journey is long and hard. We seek the support and wishes of all of you in the coming days as well.

The invited commentary of the issue discusses the effect of ongoing COVID-19 pandemic on dermatology practice and training.

We are introducing a new section from this issue – “JSSTD symposium.” The symposium of the current issue deals with a difficult to manage condition “Secondary lymphedema.” Apart from the symposium editorial, we have three review articles that focus on the different aspects of the disease.

In addition, we also bring you review articles, original research articles, case reports, case letters, resident’s page, and image section.

Hope you find this issue enlightening and interesting.

Thanking you,

Yours sincerely,

Dr. K Abdul Samad

Editor-in-Chief
